Dear Barbara,

**Re: Study Title: Randomized, Embedded, Multi-factorial, Adaptive Platform Trial for community - Acquired Pneumonia**  
**REC reference: 18/lo/0660**  
**EudraCT number: 2015-002340-14**  
**IRAS project ID: 237150**

**Substantial amendment 14 (AM014) Expedited Approval**

As outlined in the current Core Protocol (Version 3.0) the platform is designed to adapt during a pandemic to answer time-critical questions related to the effectiveness of a range of treatments for patients with pandemic infection. The Pandemic Appendix to the Core Protocol contains information about how the key elements of the REMAP will be modified during a pandemic of severe acute respiratory infection that results in community-acquired pneumonia (CAP).

We have added the Therapeutic Anticoagulation Domain specific appendix v1 20.04.20. We added this intervention into the information sheets and made a few minor semantic changes to make some of the terminology more lay friendly.

**New documentation attached and uploaded onto IRAS:**

**REMAP-CAP COVID-19 Therapeutic Anticoagulation Domain-Specific Appendix V1- 20 April 2020**
