Standard Operating Procedure (SOP) 004

Patient co-enrolment

Scope

To outline the procedure for co-enrolment of PICnIC participants onto other studies.

Co-enrolment

The Study Management Group will consider co-enrolment of PICnIC participants onto other interventional studies where the management of such studies does not conflict with the PICnIC objectives on a case-by-case basis.

Co-enrolment agreements with other interventional studies will be put in place, as requested.

Participants are permitted to co-enrol in studies that do not involve an intervention (e.g. observational studies).

Details of any co-enrolment should be documented on the PICnIC Screening and Enrolment Log. (See SOP 003_Patient Screening and Enrolment for further details).
