

Does your patient have a platelet count $<50 \times 10^9/L$?

Aged 18 or over

Accepted/admitted to critical care

Need a procedure

- Central line insertion or removal
- Paracentesis/superficial abdominal fluid collection/drainage
- Pleural aspiration
- Arterial catheter insertion or removal
- Pleural drain
- Wound dressing change
- Bronchoscopy
- **Or, any invasive procedure you deem to be low bleeding risk**

THEY COULD BE ELIGIBLE FOR T4P!
